THE 5 NUMBERS EVERY CHIROPRACTIC PRACTICE SHOULD KNOW

You do not need to be running ads for these to matter. Every practice already has these five numbers, whether anyone is tracking them or not. They quietly shape how much you grow and how much slips through the cracks. If you have never looked at yours, that is completely normal, and it is exactly the kind of thing worth a fresh set of eyes on. Here is what each one means and what tends to separate the healthiest practices from the rest.

THE NUMBER	WHAT HEALTHY LOOKS LIKE	WHERE MOST LAND
01 **SPEED TO FIRST RESPONSE** How fast you reply when a new patient first reaches out, by call, form, or message. Interest fades fast, so minutes matter more than most realize.	**MINUTES** fast, consistent reply	**HOURS+** when staff get to it
02 **NO SHOW RATE** The share of booked appointments that never walk in. Every practice has one, and every missed slot is revenue that disappears without a trace.	**LOWER** reminders in place	**HIGHER** little to no follow up
03 **REACTIVATION RATE** How many past or lapsed patients you bring back each month. Your list of former patients is the warmest audience you have, and usually the most ignored.	**ACTIVE** regular outreach	**NONE** list sits untouched
04 **REVIEW GENERATION RATE** What share of happy patients actually leave you a public review. It is the trust signal new patients check first, and most of it is left on the table.	**STEADY** asked every visit	**RARE** only when remembered
05 **PATIENT LIFETIME VALUE** What an average patient is worth across their full relationship with you. Knowing it changes every decision about time, staff, and where to grow.	**KNOWN** guides decisions	**A GUESS** never calculated

THE QUIET TRUTH

If most of these came back as **not sure**, that is not a failure, it is the most common starting point there is. None of this requires ads or fancy software. It just requires looking. And almost every practice that starts measuring these finds easy wins hiding in plain sight.

THE BOTTOM LINE

GROWTH RARELY COMES FROM DOING MORE. IT COMES FROM SEEING WHAT YOU HAVE BEEN MISSING.

On our call, we will walk through these five together and get a clear read on where yours stand today. No pressure and no jargon, just an honest look at which number holds the most upside for your practice right now.

LET'S FIND YOUR NUMBERS.
